

“When your customers become victims of **identity theft**, your financial institution pays the price. Keeping your customers **informed**, gives them the advantage over the criminal.”

Jim Stickley

Advisor

Scams, identity theft, viruses, worms and credit card fraud are happening more frequently today than ever before. Your customers are continually alarmed by these threats to their personal information and are looking to your organization for help. SoS Advisor will proactively educate your customers about the many security risks they face and provide them with the actionable information needed to help keep their financial information secure.

SoS Advisor provides your customers with helpful tips necessary to stay one step ahead of the identity thief. It is a cost effective solution that turns your website or online banking application into a comprehensive customer security advisor.
